Terms of reference for the design of a business model for the Elundini Furniture Manufacturing Entity

1. Project Purpose

A service provider is required to provide the Elundini Local Municipality with the business solutions that will provide a design for the business model for the Elundini Furniture Manufacturing Entity. The project is meant to address the socio economic needs of the community of Elundini and was designed as an extension to the investment by PG Bison to create business opportunities that will benefit the greater community of Elundini Municipality. A business entity was funded and established for such purpose. The entity however requires an intervention to create a successful business model and operational plan so that the entity can achieve its objectives as stated below:

1.2 Project objectives as stated in the original business plan to access the funding

- Decent employment opportunity of initially 20 permanent positions (Both Youth and Women)
- Production of highly skilled technicians in the sub region
- Up skilling the existing furniture manufactures as well as introducing new entrants in industry.

1.3 Further description of the targeted group (Degree of involvement of the community into the project)

- Youth, unemployed matriculates, existing backyard carpenters who operate as survivalists and various unemployed members of the community who have an interest in the wood-working industry within the borders of the municipality.

2. Current status of the entity

- The entity functions under a registered company whose shareholding is comprised of a Community and Worker's Trusts.
- The entity is currently not functioning but has got premises provided by PG Bison in Ugie that are ready for operations, with security provided by the municipality.
- A group of 18 prospective entrepreneurs have previously been trained in the operations of the existing woodworking machines and provided with wood-working skills including upholstery.

- The board of directors is currently not functional and the municipality, as the body that initiated the formation of the business, has taken over the responsibility to have the entity revived.

3. Critical challenges that need to be addressed are:

- Development of a comprehensive business plan in order to access additional funding from the Industrial Development Council (IDC) and/or other government funding institutions.
- Restructuring of the ownership structure of the entity so that the control and governance of the entity becomes effective.
- Creation of an operational model that will create steady employment and mentoring for individuals looking at creating own businesses.
- Promotion of the business to be in a position to access markets

4. Preferred service provider

The intention is to secure a service provider which has a practical experience in the design and implementation of a business model.

The service provider will be required to introduce the business model and implement the solutions addressing the challenges that have been experienced as proposed by the new model. The envisaged service provider should have the full understanding of the timber industry and the value addition streamlines towards the manufacturing of furniture and other related products. It is important that the company should also reflect on the value that it can add to this business after the model has been designed and implemented.

5. Functionality Evaluation Score Card

Bids that scores less than 70 (seventy) points out of 100 (one hundred) points in respect of the following pre-evaluation eligibility criteria, will be regarded as non-responsive

Points	CRITERIA TO BE USED
20 points	1. Must have experience in formulating an operational plan in manufacturing <ul style="list-style-type: none"> • 10 years – 10 points • 20 years - 20 points Bidders to provide proof of experience through appointment letters and copies of documents.
